**Kristine K. Kershul : Italian in 10 Minutes a Day, 5th Edition** before purchasing it in order to gage whether or not it would be worth my time, and all praised Italian in 10 Minutes a Day, 5th Edition:

0 of 0 people found the following review helpful. Book is great for beginners and natives who do not want to forget, but CD IS VERY DISAPPOINTING! By ForzaI bought this so I can make sure NOT to forget how to read and write in Italian and have found it to be a great starting book for both beginners and natives. It starts you out with the alphabet and gives you the break down of each letter, how to pronounce it, and an example. The book is separated in sections, like family, religion, restaurant, etc. and starts out with a word, how to pronounce it and underneath that it gives you the meaning. It slowly gets you used to the words and then stops giving you the pronunciation and meaning, giving you a chance to utilize what you learned. A bonus, at the end of the sections there are games, stickers, etc. giving you a chance to practice more in a fun way. I am Sicilian and I have come to realize it is nearly impossible to find good Italian learning books. If found they usually cost twice as much and are not always extremely helpful. This book gets a BIG THUMBS UP from me! 1 of 1 people found the following review helpful. Can't learn a language in 10 minutes a day...BUT you CAN learn to get along in another language with these books! GREAT!!! By Tina G. Newman OK! While no one can learn another language in 10 minutes a day, this series of book WILL give the user a good platform to be able to enjoy a holiday in a country where they don't speak the language. It gave me the ability to comfortably say pleasantries like "please, thank you, no-thank you etc." I was able to order from a menu with surprising ease and could ask simple questions like "Where is the toilet?" VERY easy to use and the stickers that you put all over things (remove easily!) puts the words in front of your face and you learn the names without any REAL effort. This is a great

series of books. I have used them in German, Italian and French. I have also seen them being used in Venice, Italy by Italians to learn Asian. I have used them to learn some Russian too...boy that's not easy! This book helps for sure! I have even purchased them as gifts for high school students...they really DO help!0 of 0 people found the following review helpful. Reasonable book. CD very disappointingBy RuthThis book is nicely laid out and I think would be useful for basic communication. Like so many language courses that rely on repetition because they don't really want to teach you grammar, the student is stuck memorizing tons of stuff without being shown the patterns on which the language is based. This means you have to absorb those rules and patterns very slowly - when in reality (despite what all the amazing language programs want to tell you!) adults do NOT learn languages the same way children do - our aural recall is not as good as theirs, and we learn much better by learning patterns.Also the CD was horribly disappointing - I expected it would have the same lessons as the book, but instead it is just an alphabetical list of words. This would be great for review once you have finished the course, but it is of no help at all to learn the spoken words at the same pace as the written lessons in the book.

ITALIAN in 10 minutes a day® is an easy-to-use language kit designed to develop an immediate speaking ability. The illustrated workbook contains 132 colorful pages filled with practical words, built-in study tools and essential categories. The focus is on success, practicality and fun.
