**John Newman : Kent: West and the Weald (Pevsner Architectural Guides: Buildings of England)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Kent: West and the Weald

(Pevsner Architectural Guides: Buildings of England):

An expanded and fully revised edition of John Newman's classic survey of the buildings of West Kent, first published in 1969. Here is an extraordinary concentration of architecture of the first rank, and an immense variety of landscape and townscape, from the deep woods of the Weald to the shingles of Dungeness, the cathedral city of Rochester with its Norman castle, and the remarkable Georgian naval dockyard at Chatham. Domestic buildings of note range from plentiful timber-framed hall houses to the Palladian masterpiece of Mereworth Castle and the planned modernist village of New Ash Green, as well as country houses on the grandest scale, such as Cobham Hall and Knole. The parish churches can show rich and memorable work of almost every period, especially the middle ages and the Gothic Revival. This new edition includes detailed explorations of many rewarding urban areas, and fresh perspectives on such famous landmarks as Ightham Mote, Sissinghurst and Hever Castle.

About the Author John Newman first became involved in The Buildings of England as Nikolaus Pevsner's driver, in Berkshire and Hampshire, and after writing the Kent volumes was the co-author of Dorset. He went on to contribute Glamorgan and Gwent/Monmouthshire to the Buildings of Wales series, and is author of the revised Shropshire volume (2006).
