They divide the city you are visiting so you are only viewing one section at a time. You can't get lost. They have the train and bus routes also in the book. I have about 11 books for different cities, would not travel without the Knopf Mapguide for the City I was visiting. 0 of 0 people found the following review helpful. Best. Map. Guide. Ever. By Nick I wish they had these for every city I ever wanted to go to. It is the perfect combo of map and info. Just whip this little guy out while your walking and it gives you just enough info to figure out where all the cool neighborhoods you want to visit are located

as well as food, sights, museums, bars, etc and gives you some recommendations to start off at. A little something for everyone in the recommendations too. All include a public transportation map. You will never be lost. Most travel guides are information-overload. Who wants to read a 100 page dissertation on a place, you just want to go and have a good time and Mapguides let you do that. I love these, if they make a Mapguide for a city I'm visiting, I buy it. 2 of 2 people found the following review helpful. It's a must have map and city guide! By Martinique Lin I kept this little book in my handbag for the duration of our stay. Although I ordered other books, this one with it's fold out maps on each page made it easy use, and it became invaluable. I never once refered back to the other books I purchased because this one has it all. Each page is a fold out map with cafes, shopping, restaurants, bars and other places of interest listed with a brief description. I got one for Paris as well and i'm using it to plan my trip there this summer, to get to know the neighborhoods around hotels, to see where the metro stops are etc. One of the best maps I've used. You'll never look the fool unfolding a huge map, or fighting to fold it back up again.
