Takes the mystery out of using public transportation in Rome! Very compact and durable AND light weight. Shows most of the places you want to see in small pictures. You can find other sights easily on the ground. Looking at the map I can see that you might possibly take the walk from the Vaticano to the Colosseo along the River and hit some neat places on the way! Oh the Restaurants!! Certainly doable if you are fit. A time saver. No wandering and wondering...Don't hit town without it. Having been to Rome, when you get off the train near the Vatican you do not have a clue if it's your first time. Lot's of Buses and Taxis! Which one?? You can most likely get a map in Rome but WHERE? Why not just have this with you??? As always, BEWARE OF PICKPOCKETS!! Especially on Buses and Trains. DO NOT HAVE ANYTHING VALUABLE IN YOUR POCKETS OR PACK!! Try to wear your pack in front of you. One more reason to pack light! Use a money belt hidden from view or do what I do: I use Belt Pouches secured with big strong rubber bands cut from a big bicycle tube. About a half to three quarter inch wide and strong! Take a cane and carry it always. Wear a VEST with inside pockets all zipped up. Turn around frequently while walking and LOOK behind you. Avoid "chummy" situations with pairs of groups of Romans. They are NOT your friends! They are after your stuff! Put your larger Euro notes inside your shoes. Good map and good info. Worth every penny and ounce! 1 of 1 people found the following review helpful. Compact Bus Route Map By Rebecca Wood Wanted to pick up a small bus route map for my honeymoon in September. I studied abroad in Rome but couldn't remember all the bus routes. This map is compact and I know will come in handy. Thanks!

Imported from Italy, this tiny laminated four-fold map helps you find your way around fast in the Eternal City. First, a full-color street map on the front provides names of streets, locations of metro stations, and locations of airports, police and carabinieri, first aid providers, and taxi stands. On the reverse, you have a diagram of the metro and city railways that includes locations of intersecting bus and rail stations and also the reach of your Metro pass. Two additional diagrams give detailed lists of the metro, bus and train connections at each station, so you can know what station to go to to catch the train/metro line or bus that you want. Easily fits in a jacket pocket or in the water bottle pouch of a backpack. Authoritative mapping from Italy for under \$4!
