**Michael Diggin : Landscapes of Ireland** before purchasing it in order to gage whether or not it would be worth my time, and all praised Landscapes of Ireland:

A brand new collection of photographs from one of Ireland's most renowned photographers. Based in Tralee, Co. Kerry, Michael Diggin has an international reputation as a photographer of the Irish countryside and of its landscapes. This book concentrates on the beauties of Ireland rather than on the built environment. Page after page brings a succession of beautiful landscapes: rolling countryside, steep cliffs, off-shore islands, the lush countryside of the Golden Vale and of the wonderful mountain ranges around the coast. The book covers the entire island of Ireland: there are photographs from every one of the thirty-two counties - all designed and laid out to illustrate the variety,

splendor and beauty of the Irish landscape. Other books by Michael Diggin Visions of Ireland Notelets: At the End of the Day Visions of Ireland Notelets: Reflections Visions of Ireland Notelets: Times Past Landscapes of Ireland - French Edition Landscapes of Ireland German Edition Visions of Ireland Notelets: Horizons
