By DavidI already owned the Michelin Italy map at 1 to 300,000. But it was so small scale you could not see enough of the secondary roads. This Freytag-Berndt map is 1 to 150,000, twice the scale, but you still cannot make out the complicated intersections of roads. Good for planning purposes, but I will probably get some really large scale local maps when I get to Italy. (plus GPS)

By CustomerThis is a well printed map on sturdy paper. Level of detail is good. Shows rail and boat routes. Mountain areas are nicely color shaded. Coverage area is as advertised so don't expect anymore. Be prepared for a fairly large map once unfolded - this is not something you can easily slip in your pocket. Due to size may be best suited for trip planning if you are trying to travel as light as possible.

Road and tourist map of the Lombardy region of Italy, including Milano, Lago di Como, Lago d'Iseo and Lago di Garda that depicts elevation with shaded-relief and color tinting. Map shows roads, tourist routes, rail and ferry lines, distances in kilometers, natural features, parks, and places of interest. 31-page booklet includes information in four languages on the top 10 tourist sites, a city plan of Milan, and placename index. Legend in English, French, German, and Italian.
