Dana Facaros : Lombardy, Milan Italian Lakes before purchasing it in order to gauge whether or not it would be worth my time, and all praised Lombardy, Milan Italian Lakes:

7 of 7 people found the following review helpful. The Best of the Bunch By E. Cole I bought 4 books for our trip to the lake region and this was by far the most useful. Granted it does not include specific information about hours and costs for museums and sites, but we found that most of that information in the other books was out of date anyway. Use it with another guide if you need that. This book gives detailed background information on each area with history and culture, which gives you a great head start on your appreciation of the places you visit. We also found that it included some out-of-the-way places not in the other guides and really appreciated the personal opinions. Restaurants we tried

on their recommendation were excellent, compared to the mixed results when we picked on our own. No guide is perfect, but this one comes very close, and the coming 5th edition may be even closer!6 of 7 people found the following review helpful. The Best of the BunchBy E. For example, we are told that above Orta San Giulio there are several fetching towns and attractions but we are not told how far they are or how to get there. Is a car required? Any public transportation? Is the sanctuary a pleasant 2 mile walk or a challenging 7 mile hike? Perhaps if you are making a return visit such details are not necessary, but for the first time visitor they are essential. Also, anyone planning to visit this area will most likely include both Mantua and Verona on their visit, but only Mantua is covered here. (Yes, Verona is not technically included in the 'Lombard Plain,' but can you imagine a guide to LA that didn't include Disneyland because technically it's in Anaheim, not LA?) You'll need another guide for Verona. If the authors issue a revised edition including Verona plus more detailed info, this will be an excellent guide. Mr Pauls, can we hope for this?

The new edition covering the Italian lakes of Garda, Lugano, Iseo, Como, Orta, Maggiore and the cities of the Lombard Plain: Pavia, Cremona and Mantua, as well as the link city to the lakes, Milan -- the mecca of finance and fashion. Authors Facaros and Pauls plunge into the romance of the Italian lakes and their history and art, both anecdotal and cultural. They have also gone into practical detail with city and lake maps, ferry timetables, a careful guide through the rich culinary diversity of the region and extensive choices of where to stay and eat.

"Characterised by strong voice, quirky point of view, and anecdotal style"--Approach
