From Hallwag : London (City Flash Maps) before purchasing it in order to gage whether or not it would be worth my time, and all praised London (City Flash Maps):

The ones I used to buy for major cities had specialized maps, each one showing the locations of the major theaters, museums, restaurants, or other destinations, with an accompanying key for all the points of interest on that particular map. If you were looking for a certain museum in Chicago, the locations of the city's museums were shown on one map, with an alphabetized key next to it to help you find the one you wanted. The London "flash map" I received was very nice but had nothing to help me find a specific destination. It was just a map of London. I have several London maps already so I gave this one to a friend. It's not one of the Flash Maps I used to love and swear by.1 of 1 people found the following review helpful. wonderfully concise! The only map you need.By h stewartThe only flash map with bus routes. Includes a map of the London underground too. You can easily navigate London with just one map. All the key destinations are marked on the map.Taking the city buses is the inexpensive way to sightsee and far less crowded than the underground.0 of 0 people found the following review helpful. Christmas Present for TreyBy DebiI bought this for my grandson for a Christmas present. He loves it - and anything to do with London. He said if he ever got the chance to go to London - he would recognize some of the street names....from his map!
