Knopf Guides, Knopf Guides Staff : London (Citymap Guide) before purchasing it in order to gage whether or not it would be worth my time, and all praised London (Citymap Guide):

0 of 0 people found the following review helpful. O.K.By felicitazNice maps, but not complete. I ranged out of these areas frequently on my travels.0 of 0 people found the following review helpful. Great Travel Resource! Wouldn't leave to Europe without it!By CA TeacherWhile on a 10 day trip to London, my husband and I brought several guidebooks with us. More often then not, we always gravitated towards this guide.The guide is small and easily fits inside a purse, coat pocket, or backpack. We loved the detailed maps that flipped open and easily folded back into the book. We also liked the format of the book, which broke down the city into manageable and detailed sections. Visiting

London on our own without a tour guide, this book made it easy to plan out our days and we were able to use the tube map in the back or look at the streets to get us to where we needed to go. There are descriptions and pictures of the main sights on the map page so we always knew what to see in the area where we were at. On the other side of the maps, there are places to eat, places to shop, and other activities that are nearby which proves to be a handy reference. What made my husband and I laugh was when people would ask us for directions! This happened on several occasions, and we didn't even have our guidebook out. I found this guide to be a life saver! We have been to other cities before and used other guides maps, which only proved to be frustrating because they were not detailed enough, too big/bulky, or difficult to read. The map/guide made it so easy for us to figure out how to navigate the city on our own and made our trip very enjoyable! I already bought several of these guides for other cities, finding it a necessary resource for all our trips!

While touring London, I carried 5 or 6 different books and maps with me, not knowing which one was "the best" but wanting to have all my bases covered. However, while I was actually in the city, this was virtually THE ONLY book I used. This book has maps of the whole city so you can get the general idea of its layout, plus a map of the various zones of London so you can find anything if you have its zone number. It also has a map of the tube lines and stations, which comes in extremely handy - the underground is the fastest, cheapest, and easiest way of getting from place to place in London. A majority of the book consists of fold-out maps of the various districts of London, from Notting Hill to City and Southwark, each having detailed street layouts and point of interest labels. With each of these maps are reviews of the district's best restaurants, cafes, bars/pubs/nightlife, shopping, and sights, all of which we found handy (unlike many of the other books). The whole book is color coded, so it is easy to find each section. And it's so small and easy to carry! The book is maybe 5x7 inches and less than an inch thick. Again I say, if you're going to London, this book is the one you need. Leave those other ones at home; you won't need them - I didn't!
