**From Collins : London Street Atlas: Large** before purchasing it in order to gauge whether or not it would be worth my time, and all praised London Street Atlas: Large:

This large scale, full colour, street level map from the Collins/Bartholomew digital database has a handy "lie flat" spiral binding. Main features include: central London at extra large scale of 7.68 inches to one mile; an extensive area

of coverage; clear mapping, full indexes to streets, place names and places of interest; theatres, cinemas and shopping maps, classified roads and colour coded land use. Coverage stretches from Enfield in the north to Croydon in the south and from Heathrow in the west to Dagenham in the east.
