Mark Denton : London: The 100 Greatest Panoramas before purchasing it in order to gage whether or not it would be worth my time, and all praised London: The 100 Greatest Panoramas:

This title includes stunning new visions of the greatest city in Europe - 100 panoramic views in true perspective. It offers a unique introduction to London's spectacular architecture and heritage. Shot entirely with a classic panoramic camera, Denton's distinctive photography reveals some of the finest ever wide views of London, including cityscapes from vantage points never before accessed. The majority of the images are taken at the magic hours of dusk and dawn, offering richly saturated new interpretations of the city's most recognizable landmarks. Painstakingly waiting for the perfect light and weather conditions, Denton adds an entirely new vision to existing photography of London. Among the extraordinary views included are the high-level vistas from the Goldfinger buildings, from Tower 42, from the uppermost supports of Tower Bridge, from the London Eye and Wembley Arch, as well as breathtaking new views of London's famous parks and open spaces. London is where the historic past and a vibrant present come alive. Its blend of history and rich architecture ensure its must-see status around the world. This magnificent volume puts the city in an entirely new perspective.

About the Author Mark Denton is from Sunderland, Tyne and Wear, and brings a unique perspective to the photographing of London. Specializing in the panoramic format, he takes his inspiration from British photographers such as Joe Cornish and Colin Prior. Cameras used are principally the Fuji G617 Professional and Mamiya M645.
