Fiona Duncan, Leonie Glass, Carolyn Sharpe : London Up Close: District to District, Street by Street (Up Close Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised London Up Close: District to District, Street by Street (Up Close Series):

3 of 3 people found the following review helpful. Bird's eye, 2-D perspectives on every London locationBy A CustomerHere's a wonderful pocket reference for touring London. (Up Close books are available for other cities, too.) From any spot in the city, the book gives you a bird's eye, fully two-dimensional, street-by-street, building-by-building, park-by-park, intersection-by-intersection view of where you are, what's around you, and what's on the next street or the next block. Use it in conjunction with a conventional street map; it's like being there before you get there. And best of all, with increasing distance away from your point of view on the pages, the 2-D line drawings don't get smaller, perspective-wise. We've used the Up Close books in Paris and Rome: enormously helpful and fun.2 of 2 people found the following review helpful. 2-dimensional book showing buildings on streets in LondonBy A CustomerThis book was published in 1992, and needs to be up-dated as it is a wonderful format. The information is dated, and many of the retail places mentioned may not be in existence after 8 years. I would love to see a year 2000 version!

Presents information on London's historic buildings, museums, parks, and other points of interest, and includes maps of each city district.
