The walks are long, but one can always quit half-way, except that requires going back to the place you where you stopped. Again, what's with the publisher's (I can't believe authors approve this) insistence on printing these travel

As good as interesting By Jesus Camino Nieto It's a book with another point of view about possible visits to London, very interesting all of them.

Revised and updated, the popular On Foot Guides offer city tours in a totally new way? illustrating a variety of walks with full-color, aerial-view, three-dimensional maps to give users an immediate sense of each route and what can be seen along the way. The informative text offers accurate, discriminating descriptions of places to stop and shop, eat, drink, or sightsee. Most walks are one to three hours in length, making them ideal for busy tourists or inquisitive locals looking to explore the more interesting neighborhoods and sites of each city. Color photos of top attractions round out the contents of these clear, easy-to-use guides.
