**Damien Simonis : Lonely Planet Barcelona** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Lonely Planet Barcelona:

Maps were completely unreadable. Very difficult to flip between text and the relevant maps. I had to actually go and buy the the hard copy. I WANT MY MONEY BACK!! I only use LP travel guides. Won't be using the ebook version til they bring themselves into the 21st century. Let me know when this

happens. Very disappointed. 1 of 1 people found the following review helpful. Wonderful info

The maps and recommendations were great. We did their walking tours and tried some of the restaurants they recommended. Their assessments of the neighborhoods and what was worthwhile was very accurate. The organization of information is more intuitive and budget-conscious than with the Fodors guide I was using for a different location. 0 of 0 people found the following review helpful.
