Lonely Planet : Lonely Planet London (Lonely Planet City Maps) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Lonely Planet London (Lonely Planet City Maps):

4 of 4 people found the following review helpful. Concise and Very Useful
By Robert I. Hedges
This is an excellent map of London. Evidently some of the tube information is a bit out of date, but aside from that minor quibble, it is a very sturdy and utilitarian map. I like that it is an accordion fold laminated card format, as it is eminently durable and near waterproof. It would be very difficult to damage. It is particularly good to gain a 'lay of the land', particularly in the planning stages of a trip. It is quite easy to visualize where you will want to stay, visit, walk and ride. I like that it has a nice 'London walking tour' outlined, and has all prominent landmarks and points of interest clearly labeled. There is also an excellent and complete index, map of West End theatres, an inset map of inner London, and an underground map. Overall, for initial trip and route planning as well as navigating London's sights, this is an excellent map at a bargain price!

15 of 15 people found the following review helpful. Older map but still pretty good
By Nick
The map is a fantastic map for your first time in London. The only gripes are that the map is 4 years old, and doesn't reflect London's new area code, nor does it have updated Tube maps. The solution is to just grab an updated Tube map from any Underground station. Not a big deal, but still a major gripe. But Lonely Planet maps are fantastic - they include walking tours and every major point of interest is covered.

3 of 3 people found the following review helpful. Not Worth It!
By Howard F.
Having been to London twice and still not seeing it all, I bought this map after losing my trusted map. It is sturdy and easy to handle, but very confusing and not in any geographical order. I would hate to be a lost tourist in London for the first time relying on this unreliable map.

This map of London from Lonely Planet is in full-colour, is laminated and lightweight. There is a complete index of streets and sights, tourist attractions, entertainment, top end hotel landmarks, parks, shopping areas and markets.
