**From Lonely Planet : Lonely Planet Prague City Map** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Lonely Planet Prague City Map:

Find the world's largest medieval castle, countless churches, classical concerts, swingin jazz, traditional beer halls and hip cocktail bars - navigate Prague's many treasures and sights with this handy City Map. Highlights found on the map include: • Prague Castle - With its cliff-top outlook, 1100 year history, and breathtaking scale, Prague Castle is the indisputable centrepiece of the Czech capital. • Old Town Square - On any given day, you'll be able to find people streaming from every direction to sit outdoors and enjoy the view. • Municipal House - This 500 room landmark was intended to be the architectural representative of Prague, and so a collective of artists were commissioned to create this Art Nouveau masterpiece. • National Museum - The museum, the oldest in the Czech Republic, has occupied its enviable site since 1891. • Strahov Monastery - The highlight of a visit to Strahov is the library, comprising one of the oldest monastic collections in the country.
