**Lonely Planet : Lonely Planet Prague (Lonely Planet City Maps)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Lonely Planet Prague (Lonely Planet City Maps):

By choiceweb0pen0I bought this for a recent trip to Prague, a city you will get lost in without a detailed map. This map is a great size, but it covers such a small area of Prague in very basic terms, you end up needing another map. If you're buying either the Lonely Planet Prague or even Czech Slovak Republics, you can easily do without this map, as both contain the same maps along with several more.

This map of Prague from Lonely Planet is in full-colour, is laminated and lightweight. There is a complete index of streets and sights, tourist attractions, entertainment, top end hotel landmarks, parks, shopping areas and markets.
