Clem Lindenmayer : Lonely Planet Walking in Switzerland before purchasing it in order to gage whether or not it would be worth my time, and all praised Lonely Planet Walking in Switzerland:

2 of 2 people found the following review helpful. The book simply details one or two of the author's favorite long hikes in each region of the countryBy bodie jackI bought this book hoping it would have lots of information about hiking trails in Switzerland, but unfortunately it doesn't. The book simply details one or two of the author's favorite long hikes in each region of the country. Most of the book is about general travel information, such as hotels, restaurants, train stations, etc. Some of that is useful, but available in many other travel guides.1 of 1 people found the

following review helpful. Great reference
By Mark Davis Just what I ordered . Very informative. Great! Thxs. I would reccommend this to anyone who wanted to do walks throughout Switzerland
1 of 1 people found the following review helpful. One Star
By john dangelo Did not meet expectations, very cryptic!

Fully revised and updated with all sorts of new walks; accurate descriptions of lowland and alpine trails, extended trips and easy day walks; high quality, two-colour route maps; extensive planning advice with details on transport and accommodation; and an easy-to use French, German and Italian language guide.
