lu yin cheng : Looking For Austria (Chinese Edition) before purchasing it in order to gage whether or not it would be worth my time, and all praised Looking For Austria (Chinese Edition):

This is a culture book written by a scientist. More to appreciate than travel guide and more fun than literature works, it reflects authors own views on Europe history and culture. The wooden house in the forest looks like a fairy tale, ski resort always delights you. The sound of singing comes from The Danube, chair on the streets of Vienna, waltz everywhere. This is magical Austria.
