It has maps of Madrid and the surrounding roughly 25 miles of roads, towns etc, a map showing Madrid's location in central Spain, a larger map showing central Madrid with attractions, roads etc i a no-squint size and on the other side is a map showing more of the Northern and Southern reaches of the city, also easy to read. There is a nice map of the metro, very nice description of points of interest, a legend and a location index. I bought a Streetwise Madrid map before this and although it does have the advantage of being half as large and thicker material, the graphics make it much tougher to find what you are looking for.1 of 1 people found the following review helpful.
